

Our Trip: Exploring Cities, Learning, and Discovering Nature

Our trip was an exciting and educational experience.

On the first day, we had a city tour of Osterholz-Scharmbeck. We explored the city center and visited Gut Sandbeck, a historic building with a lot of charm.

The second day started with school lessons. In the afternoon, we traveled to Bremen. We walked through the famous Schnoor district, saw the Bremer Town Musicians, and visited the impressive town hall. In the evening, we went to a restaurant with the whole group and enjoyed a nice meal together.

On the third day, we had school lessons in the morning. Later, we went on a day trip to Hamburg. We visited the Landungsbrücken, saw the modern Elbphilharmonie, and explored the beautiful town hall. The highlight was the view of the large Hamburg harbor, where we could see many ships.

Day four was all about nature. We took a bus to Cuxhaven and visited the Wadden Sea Visitor Center. There, we learned a lot about the unique landscape of the Wadden Sea. Later, we walked through the mudflats and discovered different animals, like the waddling worm, shells, and small snails. The Wadden Sea is a UNESCO World Heritage Site and is home to many special plants and animals. It is an important place for birds and sea life. In the evening, we had a barbecue with the whole group, which was a perfect way to end the day.

On our last day, we had school lessons again. Later, we visited the windmill "Mühle von Rönning" to eat some German traditional food.

Overall, our trip was full of great experiences. We saw interesting cities, learned a lot at school, and explored the beautiful nature of the Wadden Sea. It was a wonderful time with many unforgettable moments!
